## **DETAILED ACTION**

### ***Drawings***

1. Figure 11a, 11b &12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Allowable Subject Matter***

2. Claims 1-9 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-9 is the inclusion of the limitation of a sub-slit for forming an open stub that is connected to the U-turn portion and that provides the U-turn portion with electrostatic capacitance is formed, independent of the main slit, in the feeding radiation electrode. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Nagumo et al. (U.S. Patent No.6,657,593) teaches a fed radiation electrode and a non-fed radiation electrode are disposed with a gap provided therebetween. A fed

terminal section and a ground terminal section are arranged substantially parallel with a gap provided therebetween on a front end surface of the dielectric substrate. The fed radiation electrode is configured such that a slit is provided in a plane-shaped pattern on the upper surface of the dielectric substrate. However, Nagumo et al. does not teach or disclose a sub-slit for forming an open stub that is connected to the U-turn portion and that provides the U-turn portion with electrostatic capacitance is formed, independent of the main slit, in the feeding radiation electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
